

To whom it may concern

Dual-Use Statement.

SENECA products are designed to be components of industrial, commercial or residential systems and are NOT considered inherently military. On the other hand, it is not SENECA's responsibility to extend its control to the additional processing or end use of SENECA products. Therefore SENECA's customers must ensure that their sales/applications comply with all applicable regulations.

Europe

SENECA products are not included in the list of dual-use items and technologies according to EU Delegated Regulation 2023/66 which came into force on January 12, 2023 and amended Regulation (EU) 2021/821 of the European Parliament and the European Council regarding the list of dual-use items contained in Annex I.

US

With the exception of industrial communication and telecontrol devices, SENECA products for export to the U.S. classified as EAR99, which are typically low-risk and low-tech, are not listed on the Commerce Control List (CCL).

Restrictions

SENECA products are not covered by the International Traffic in Arms Regulations (ITAR) restrictions or the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies.
